

INTEGRITY TREE IMAGING

See your tree from the inside out.

Why use Radar Imaging?

Radar=Radio Detecting and Ranging

1. **Precision**—Creates a snapshot every ¼ inch of scan length.
2. **Reliability**—GPR developed in 1929 to measure thickness of glaciers; used today in microwaves and wi-fi.
3. **No mechanical mistakes**—Radar is electromagnetic radio waves (cellphone technology).
4. **Versatility**—Multi-dimensional, compared to tomography and Resistograph. Able to scan trunk, roots, root crown, limbs.
5. **Affordability**—Competitively priced compared to a Resistograph report from 2023 in Atlanta, GA.
6. **Saves money**—Increases the success rate of care administered and saves money spent on incorrect treatments and over-fertilization.
7. **Proven technology** in a wide variety of uses-weather radar, law enforcement, military.
8. **Liability**—Risk management, environmental health/safety.
9. **100% Non-invasive and non-destructive** procedure.
10. **Fast scanning time**—approximately 2/3 faster than sonic tomography.
11. **Locating capabilities**—Able to detect roots, utilities, drainage, electrical lines, and gas lines.
12. **Penetration**—typical and deep structural scans 3"-144".
13. **Precise mapping**—exact location, measurements, and markers of roots to assist in construction/landscaping.
14. **Easily portable**—If you can get me there, I can scan it.
15. **Ultimate in due diligence**—Greatest attempt to avoid adverse effects on people and property.
16. **Satisfies burden of proof**—Highest level of justification and quantification for prescribed arboricultural procedure.
17. **Detailed images**—Rot, decay, softwood, cracks, metal reflectors, morphology, root density, root size, root depth, utilities, drainage issues, compaction, 2- and 3-dimensional images.
18. **Integration**—DXF files plug straight into CAD systems.
19. **Not affected by climate or weather**.
20. **Teamwork**—We made the investment in this equipment, so you don't have to.

"Integrity" has various uses and meanings at Integrity Tree Imaging. In all cases, there must be a right standard

with which to compare the results from tree scans. The same is true in how we conduct ourselves and do business with others. We strive to achieve the highest integrity with you and all our clients. We choose the Holy Bible as our right standard to guide our work and relationships with others. As we close this email campaign, thank you for giving us your time and attention by receiving the information we have shared over the past year. Together we will continue to work to strengthen and improve the integrity of the arborist and urban forestry professions. --Bron Holcomb, Anthony Payne

*"I will put in the desert the cedar and the acacia, the myrtle and the olive. I will set junipers in the wasteland, the fir and the cypress together, so that people may see and know, may consider and understand, that the hand of the LORD has done this, that the Holy One of Israel has created it."
Isaiah 41:19-20*

Magnificent Results

"They will be like a tree planted by the water that sends out its roots by the stream. It does not fear when heat comes; its leaves are always green. It has no worries in a year of drought and never fails to bear fruit." Jeremiah 17:8

"The waters nourished it, deep springs made it grow tall; their streams flowed all around the base and sent their channels to all the trees of the field. So it towered higher than all the trees of the field; its boughs increased and its branches grew long, spreading because of abundant waters." Ezekiel 31:4-5.

Make Good Tree Care Great

TRU 900^(R) radar imaging is the most effective method for the best, regular maintenance of your trees. Eliminate doubt about the exact condition and vitality of your trees. Use the button below to schedule an appointment. See your tree management improve by partnering with Integrity Tree Imaging!
