

# INTEGRITY TREE IMAGING

See your tree from the inside out.

**Scheduled Maintenance**

All vital and important components of life require maintenance. Trees are no exception. How do we perform effective care measures without knowing the exact condition of the internal trunk and root system?

***Compare it with your regular visit to the dentist. What is the first thing that happens when you go to the dentist? They do a complete set of X-rays. How often to you go to the dentist? For some it's every six months! Scheduled maintenance. The same is true for many preventive health measures.***

Although it costs time and money, it pays off in the long run. Scheduled maintenance from Integrity Tree Imaging provides arborists and tree care professionals with the best possible information, helping trees thrive and benefit everyone.

## Routine Maintenance-The RX for Tree Health

The bountiful number of quick oil-change businesses indicates the importance of regular and routine care to extend the life of your car. Great advances in technology have made radar imaging of trees comparable to fuel injection and synthetic lubricants for automobiles. Radar imaging provides great strides forward in the effective care and the extended lifespan of trees compared to methods from years past.

## Don't Put It Off!

TRU 900<sup>(R)</sup> radar imaging is the most effective method for the best, regular maintenance of your trees. Eliminate doubt about the exact condition and tree vitality. Use the button below to begin tree maintenance based on unmatched technology and information. Your successful tree management will greatly improve with the best tree maintenance from Integrity Tree Imaging!
