

INTEGRITY TREE IMAGING

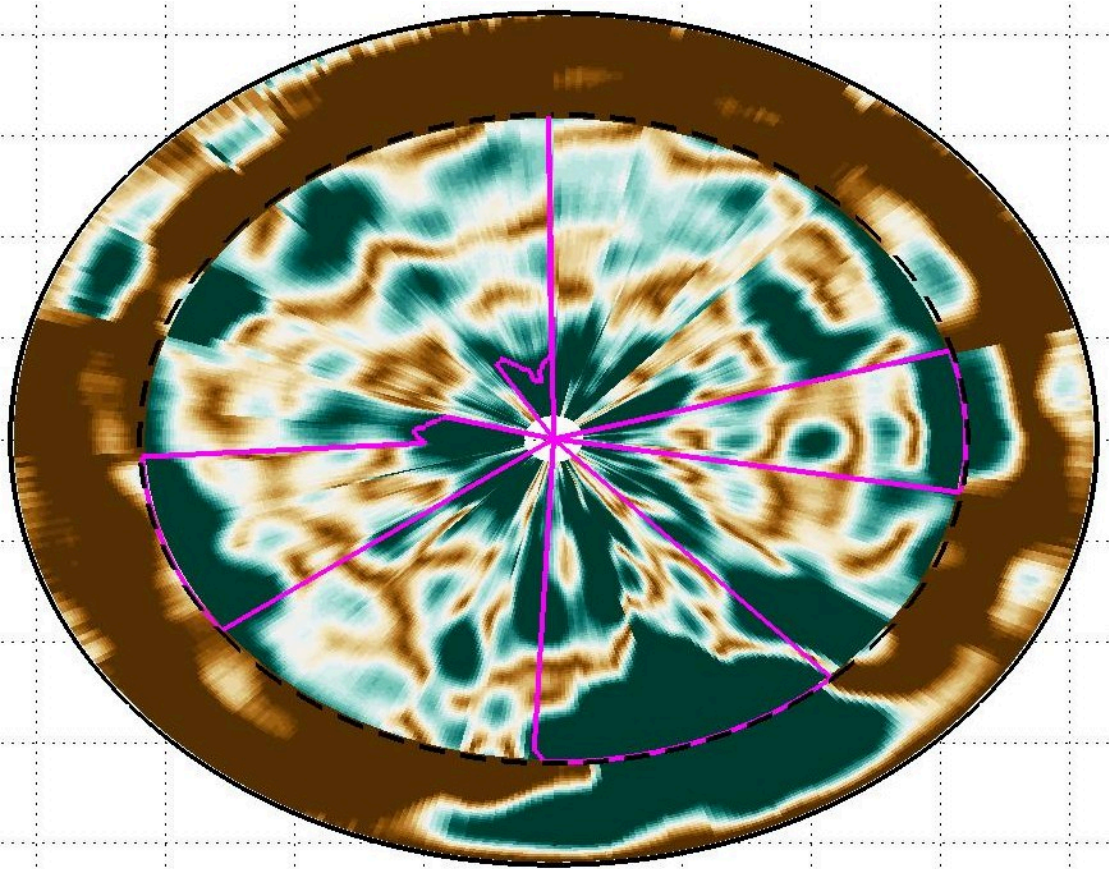

See your tree from the inside out.

What's Stopping You?

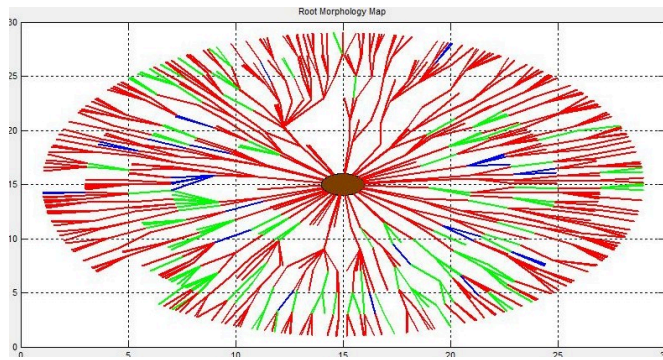

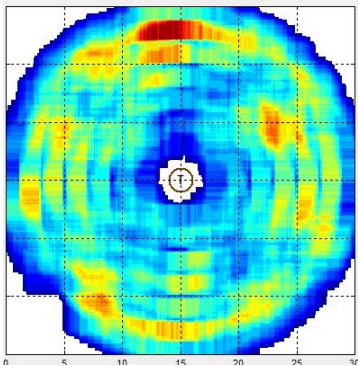

This tree was the featured in the "Three Year Update" several weeks ago. Now you are seeing the below ground images of this White Oak. Snow, frozen ground, windy conditions, cold temperatures make work outside come to a halt for most tree services and technology. These conditions make even an air spade useless for inspection. Not with Integrity Tree Imaging (ITI). Below you see the image of the root crown region and the marginal amount of decay that is present.

All Access

Capability is defined as the power, ability, or faculty to successfully perform a task and achieve a result. All other tree analysis methods are incapable of displaying the information from this tree that you see above and below even in perfect conditions. The extraordinary tree analysis from ITI is industry leading information and that is readily available to anyone who aims to manage their trees in a comprehensive and concise manner. World-class tree analysis is a phone call away.

No More Restricted Access

Frustrated by not knowing the true conditions inside your trees? Tired of being in the dark? What could you accomplish in your tree management with information like this? If that is you, we can easily overcome these obstacles for you. *Advanced analysis, provided by ITI, is the premiere service offering comprehensive and accurate analysis of the trunk, root crown, and root system.*
